

VMD 105

----By Johnny Huang

Reason I join in this class:

Last year I was taking BCST 119 class. In that class I learned some knowledge about Photoshop. After learning that, I decide to pick a class that teach more about digital media. So when I saw what is this class is about, I join in because I know I am interesting in digital media.

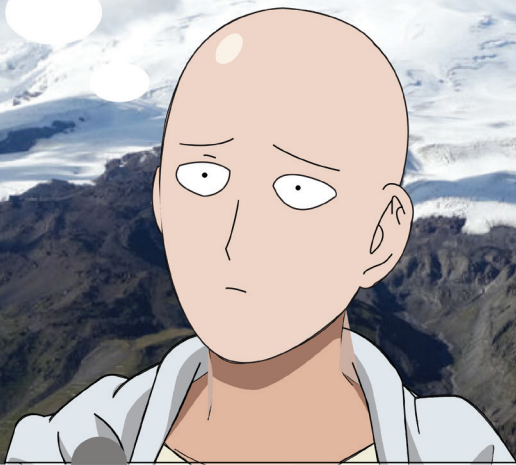

HAPPY
NEW
YEAR!

Raster Final Project

My raster unit final project is about the my favourite superhero Spider Man. My idea is coming from a scence in a video game called "Marvel Spider Man". In that game there has a scence where Spider Man is taking a selfie. I want to remake that scence and let Spider Man take a selfie infront of New York. For the word "Happy New Year", I think a new year is the most important holiday in the year, that's why I put the word "Happy New Year".

Where is
this place?

Vector Final Project

My Vector unit final project is about an anime character called Satama. I made a place where he lost and can not find his way home. I use a picture of a mountain with snow to show that Satama is in nowhere.

3

Time Base Media Final Project

In my Time Base Media unit final project, I make a scene about a rocket launching. I make two stages, one is on the ground when the rocket launches, and one is in space when the rocket is flying. I use the objects from the lab that I did before, and draw the people by myself.
